

Before / After Comparison: Outcomes Affected by the Full Audit

Generated 2026-08-04 | PRs #3-#21, sirigg98/ppm-code-review

For every commit that changes a computed outcome value, this report shows mean, median, SD, min, and max BEFORE (the code as it stood on main) vs. AFTER (the proposed fix), computed on the real underlying survey data (Box Sync / Dropbox), pooled across all respondents in that outcome's analysis sample (not split by treatment arm).

Scope: only the outcome(s) each commit directly recomputes are shown -- not further downstream consumers several files later (e.g. a fixed component that also feeds into a PCA-based investment index elsewhere is shown at the component level, not the final index, since recomputing the full downstream pipeline for every commit was not tractable). Two PRs are omitted entirely because they change no computed value: PR #17 (documents why EL Time-use is disabled -- pure comment/typo fix) and PR #18 (cosmetic cleanup / dead code, verified zero impact).

Where the current code produces a literal -Inf or NaN (the FU2/FU4 harassment -Inf bug, PR #6), that is shown as-is in the "Before" row rather than silently excluded, since that IS the bug. PR #16 adds a new outcome that did not exist before, so its "Before" row is blank by definition.

Indices built from multiple raw items (e.g. Tolerance, Democracy, joint-decision scales) are summed the same way the actual addIndex() helper does: missing components are excluded from that row's sum (treated as contributing 0), not propagated as an overall NA -- matching the codebase's own logic.

PR #3 -- Fix genPDOutcomes.qmd data path + PPM compliance rule

Outcome	Wave	Stage	N	Mean	Median	SD	Min	Max
impl_compliant (PPM arm)	Program Data	Before	930	0.914	1.000	0.281	0.000	1.000
impl_compliant (PPM arm)	Program Data	After	930	0.892	1.000	0.310	0.000	1.000

PR #4 -- Fix swapped BL migration episode counts

Outcome	Wave	Stage	N	Mean	Median	SD	Min	Max
bl_pm_mig_any_num	BL	Before	896	0.403	0.000	0.524	0.000	3.000
bl_pm_mig_any_num	BL	After	896	1.018	1.000	0.141	1.000	3.000
